This guide is for the installation of CAP's B9/B9.5 Audi A5/S5/RS5 Pre-Preg Carbon Fiber Spoiler – V2. This spoiler needs to be installed by a professional or an experienced technician. Canadian Auto Performance is not responsible for any damage caused by incorrect installation.

ITEMS INCLUDED

- 1x – B9/B9.5 Audi A5/S5/RS5 Pre-Preg Carbon Fiber Spoiler – V2
- 1x – 3M Tape

REQUIRED TOOLS:

- Fishing Line
- Heat Gun
- Rubber Adhesive Eraser Wheel
- Adhesion Remover
- Microfiber

STEP 1: Removal of Old Spoiler

Park your car on a level surface and apply the parking brake. Using a heat gun apply moderate heat to your current spoiler to warm up the adhesive. This will make it easier to remove the spoiler from your trunk.

Afterwards, use a fishing line to slowly slide it underneath the spoiler to separate it from your trunk.

STEP 2: Cleaning Trunk of Vehicle

After removing the current spoiler from your trunk, use a rubber adhesive eraser wheel attached to your drill and gently run the wheel over the trunk to remove the adhesive residue as shown in Image 2.

Apply adhesive remover to remove any final trails of adhesive that are left after using the rubber eraser wheel and wipe it down with a microfiber.

STEP 3: Spoiler Attachment to Trunk

Attach the 3M Tape across the bottom of the spoiler as shown in Image 3, and attach it onto the trunk of the car.

Apply some pressure to the spoiler in the direction shown by the blue arrows in Image 4. This is to ensure the 3M Tape adheres onto the trunk properly.

Congratulations, your new spoiler has been installed!
